

KIP 1880 compact analogue copier

Compact and simple to use – the KIP 1880 is the no-nonsense solution for low-to-medium volume drawing reproduction

Productivity

For its compact size the KIP 1880 is an impressive performer, giving a first-copy time of around 30 seconds. Subsequent prints follow at a rate of 2 A0's per minute, with an average throughput of 2000 metres per month.

Reliability

Proven components – developed from generations of KIP copiers – coupled with a comprehensive diagnostic system ensure maximum up-time. The 1880's mono-component toner and organic photoconductor not only deliver consistent high-quality copies but are harmless to the environment.

Ease of use

The KIP 1880 is the ideal 'walk up and use' machine. Features like Automatic Start-up when you insert an original, combined with a simple and intuitive control panel, remove the need for dedicated operators and lengthy training sessions. The 1880's fully automatic roll feed accepts paper, tracing paper and film media. A flat original path cares for your delicate originals and allows unhindered passage for filing strips.

Compact, flexible and quiet

The 1880 requires just 0.6 square metres of floor space, including stacking for A0 prints. It's compact size, integral castors and standard power supply mean it can be moved around the office with ease. And with it's almost silent operation, the 1880 can be used in the quietest of drawing offices with minimal noise disruption.

technical information

Original Sizes

Width	210 mm - 914 mm
Length	279 mm - 3000 mm
Thickness	0.05 mm - 0.2 mm

Copy Size

Minimum	A4
Maximum	914 mm x 3000 mm (paper)

Speed

First copy	33 seconds
Process speed	3.6 metres per minute

Multicopy

Up to 9 from each original

Media feed

Automatic roll feed for paper, tracing paper & film
Manual bypass

Edge Adjustment

Leading \pm 40mm
Trailing + 40 mm
